FIRE SAFETY INSPECTION

Site inspection sheet

One building, one visit. Work through each measure on the fire safety schedule and mark it **S** satisfactory, **D** defect or **N/A** not applicable. Give a reason for every N/A and a defect reference for every D.

CLOSING NOTES

PRACTITIONER	SIGNATURE	DATE

S satisfactory · **D** defect (log it on the defect register with its reference) · **N/A** not applicable (write the reason). For an annual fire safety statement in NSW, the measures must be assessed and the exits inspected within the 3 months before the statement is issued. This sheet is a site record, not the statement form. The example row is fictional.
